

Subtraction is to take away one number from another number to get a new number. For example, subtract the number of oranges below.

orange + orange + orange + orange + orange
- orange - orange

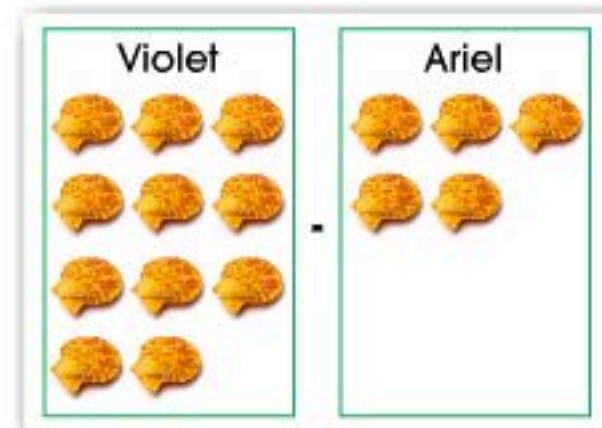

= 3 total oranges

When Violet's family went on vacation, she brought back 11 seashells. When her friend, Ariel came to visit, Violet gave her 5 seashells. How many seashells will Violet have left?

(touch the image to enlarge)

seashells

$$11 \text{ seashells} - 5 \text{ seashells} = 6 \text{ seashells}$$
