

Touch the shapes that have four sides.

a)

b)

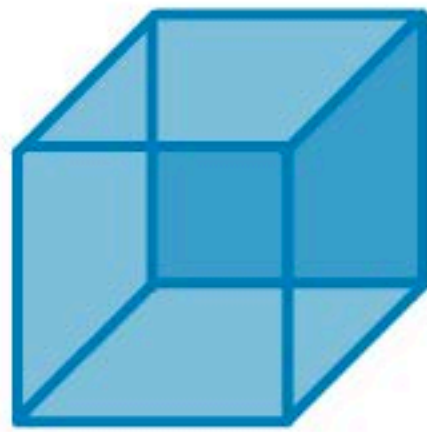

c)

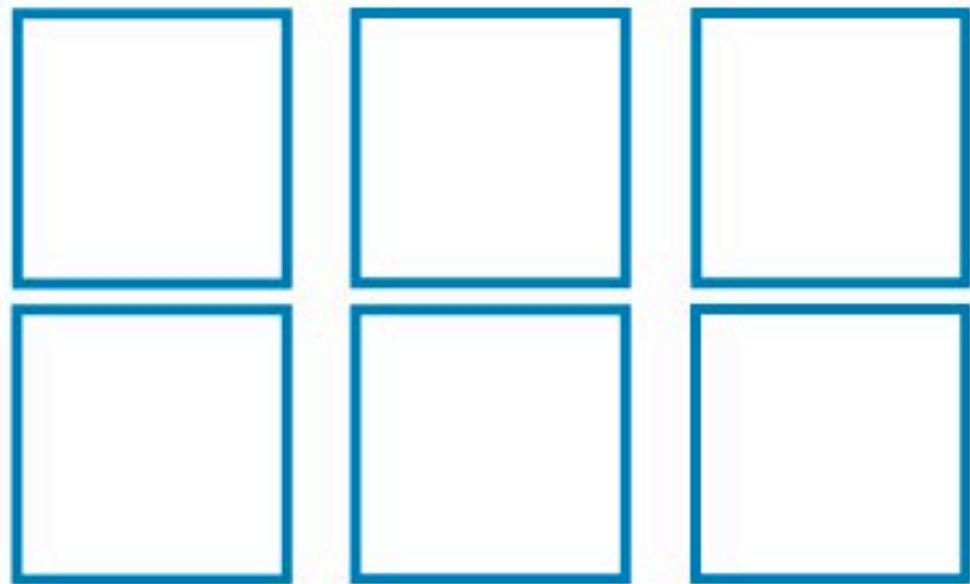

**Decomposing Geometric Shapes** is when you find shapes in other shapes. For example, the cube below is made up of several squares. Touch the cube to decompose it.

cube

=

6 squares

(continue)

Shapes can be described by their sides, corners and faces. **2-D shapes** have **sides** and **corners**. Touch the 2-D shapes below to see the number of sides and corners they have.

square

4 sides,  
4 corners

rectangle

4 sides,  
4 corners

triangle

3 sides,  
3 corners

circle

0 sides,  
0 corners

(continue)
