

Using the quarter as a guide,
measure the length of the
following objects.

a) quarters long

b) quarters long

c) quarters long

1 2 3 4 5 6 7 8 9 0

**Touch the longest length
in the pairs below.**

a)

3 centimeters

3 millimeters

b)

24 inches

3 feet

c)

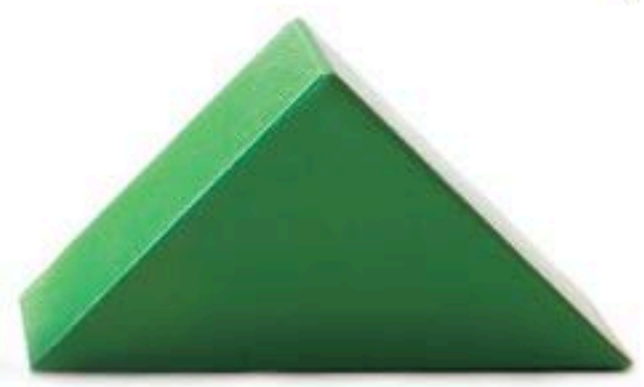

1 meter

200 millimeters

Length is the distance from one end to the other of an object. You can measure objects by using another object as a guide. For example, below is a paper clip. Use this paper clip to measure the objects below.
