

Touch the objects that have a larger area in each pair.

WELL DONE!

**Touch the largest volume measurement in the following pairs.**

a) **5 milliliters**                      **5 liters**

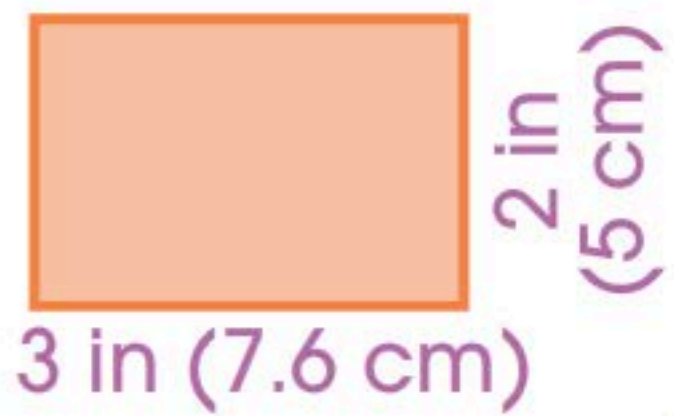

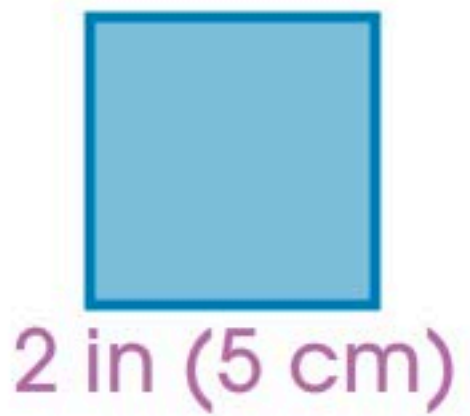

b) **5 cups**                                      **1 quart**

c) **4 quarts**                                      **2 gallons**

**Area** is the amount of space objects take up. This helps people learn the size of an object. Below are two shapes. Use the **ruler tool**  to measure the length of each side of both shapes. Then, touch the shapes to reveal their lengths.
