

Pictographs can be used to describe and compare data. For example, look at the pictograph and then answer the following questions.

Animals on a Farm

 = 2 animals

Chickens

Pigs

Sheep

Which animal is there the least of?

 touch

How many chickens are on the farm?

The pictograph to the right shows how many balloons would be needed to make each animal. Which animal used the least balloons?

skunk

horse

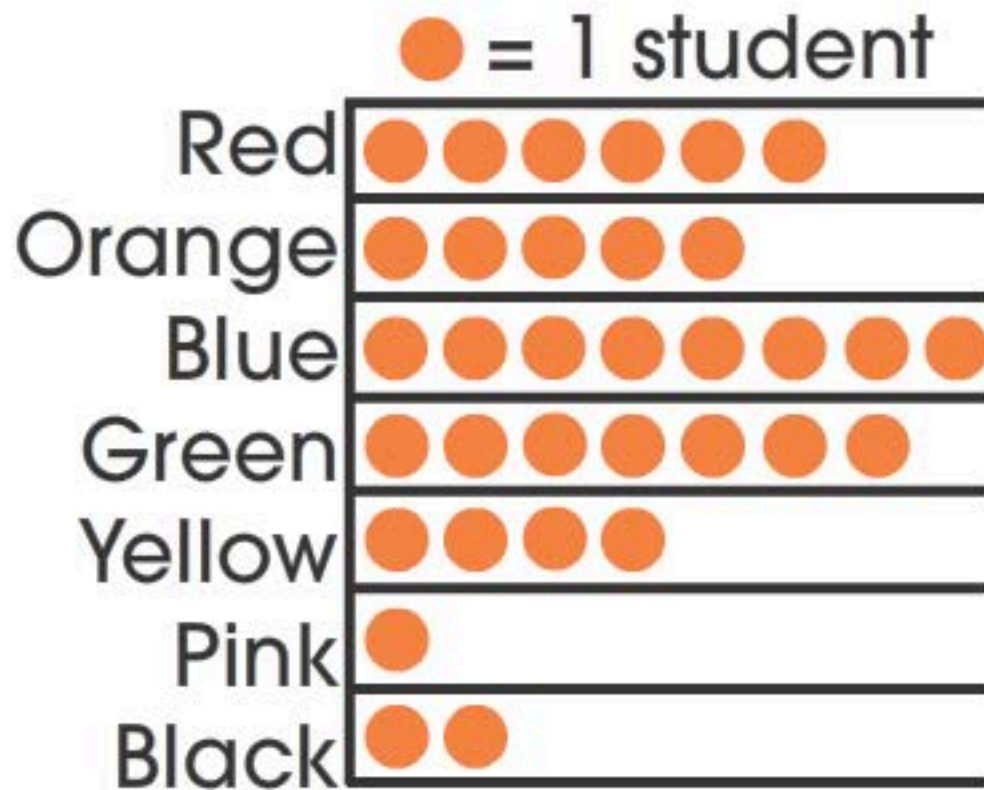

snake

= 1 balloon

skunk = 3 balloons; horse = 4 balloons;
snake = 1 balloon

The pictograph below shows the favorite colors of a group of students in a classroom.

Which color was voted for the least?

yellow
pink
black

1/6
