Julian and Caleb collect football cards. So far they have 36 different cards. They plan to put the cards into equal groups. Touch the groups below that are correct. (More than one answer may be correct.)

4 groups of 9

3 groups of 12

5 groups of 8

 **6 groups of 6**

$$36 \div 4 = 9$$

$$36 \div 5 = 7.2$$

$$36 \div 3 = 12$$

$$36 \div 6 = 6$$

Julian and Caleb gave four of their 36 cards away to friends, then divided the rest equally between them. How many cards did each get?
