

**For each pair of decimal numbers,  
touch the one that is LARGER.**

a) **2.8**      **2.67**

b) **0.12**      **0.3**

c) **0.1**      **0.02**

d) **0.9**      **0.899**

Put the following decimals in order from least to greatest.

a) **0.26**   **0.39**   **0.45**   **0.14**   **0.10**

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	----------------------	----------------------

b) **1.15**   **0.73**   **0.62**   **1.50**   **0.55**

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	----------------------	----------------------

Put the following decimals in order from greatest to least.

c) **0.32**   **0.09**   **0.98**   **0.65**

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	----------------------

d) **1.34**   **1.05**   **1.65**   **0.90**

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	----------------------

**Place Value** is the value a number is given based on where it is located in a number system. With decimals, the whole numbers and the decimal fraction numbers are given different values due to their placement in the number system. Touch the number digits in the number system to display its place value.

1 2 , 3 4 5 . 6 7 8
