**36** hours

$$\begin{aligned}
 6 \text{ pages} / 12 \text{ hours} &= 18 \text{ pages} / x \text{ hours} \\
 6 \text{ pages} \times x \text{ hours} &= 18 \text{ pages} \times 12 \text{ hours} \\
 6x &= 216 \\
 6x \div 6 &= 216 \div 6 \\
 x &= 36 \text{ hours}
 \end{aligned}$$
