

Solve the following complex proportions.

$$\frac{7}{10} = \frac{x}{4} \quad x = \boxed{\quad . \quad}$$

1/15

1 2 3 4 5 6 7 8 9 0

Reset

Solve the following complex proportions.

$$\frac{x}{12} = \frac{3}{10}$$

$$x = \boxed{\phantom{00}.\phantom{00}}$$

4/15

Solve the following complex proportions.

$$\frac{3}{x} = \frac{15}{25} \quad x = \square$$
