- ✓ **VOLUNTARY** / **INVOLUNTARY**    e) Muscle that works without us thinking about it is called \_\_\_\_\_.

**WELL DONE!**

Your heart is only the size of your fist, but it is one of the strongest muscles in your body. That's a good thing because it has a very important job. The heart **pumps** blood through your whole body every moment you are alive.

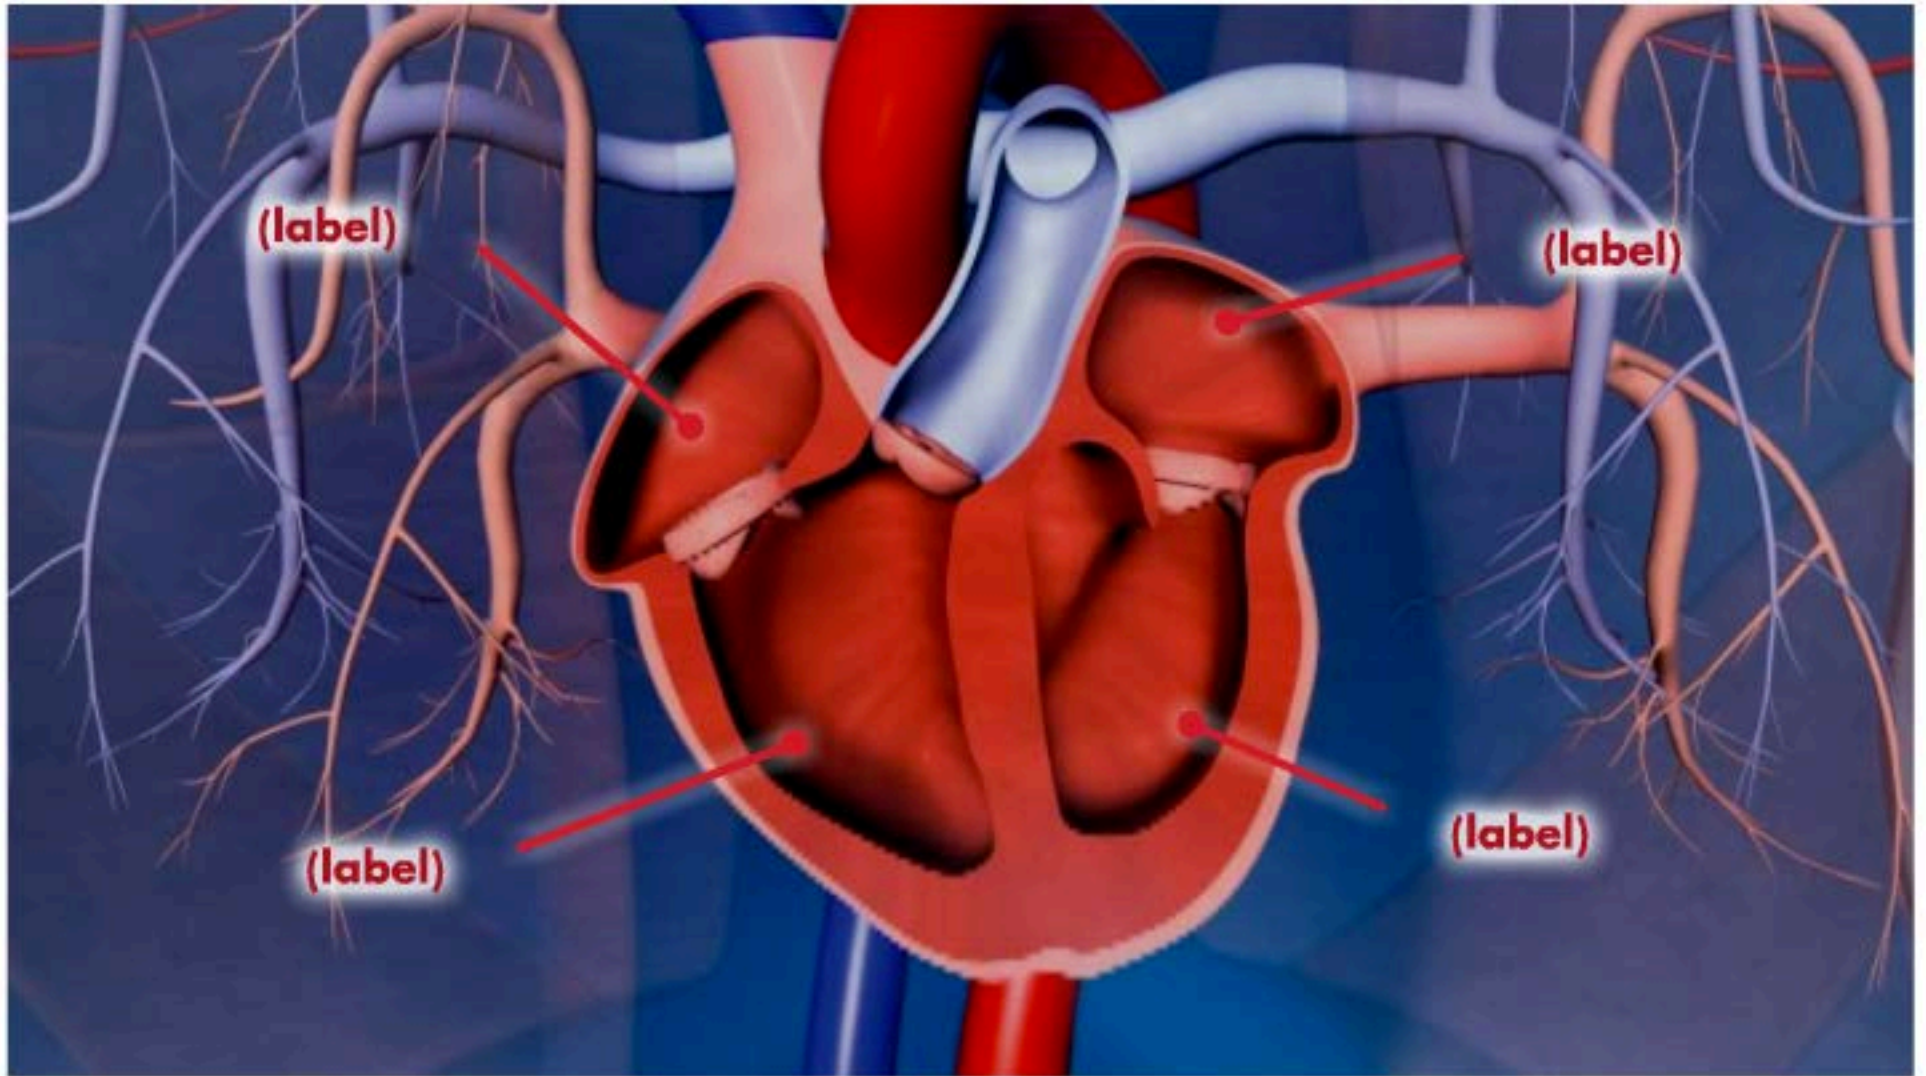

**What is the main job of the heart?**
