WELL DONE!

transportation route

This shows the places where the buses and trains travel.

industrial park

This is an area where there are not many houses, but lots of places that make things.

lake

Fresh or salt water with land around it.

river

A big stream of water.

City maps show lots of things. They show routes of buses, trains, cars, and bicycles. City maps also show you where important buildings are, like your school. City maps show you where physical features, like roads, rivers, lakes, mountains, parks, and **peninsulas** are.

Neighborhoods

Cities are split into neighborhoods. A **neighborhood** is an area of a city. It has its own traits that make it different from other areas of a city. Neighborhoods are **residential** (where you live), **industrial** (where you work) and **commercial** (where you shop).
