

Drag the correct word(s) to its definition below.

relative

population density

population

a)

The number of people living in a given area.

density

b)

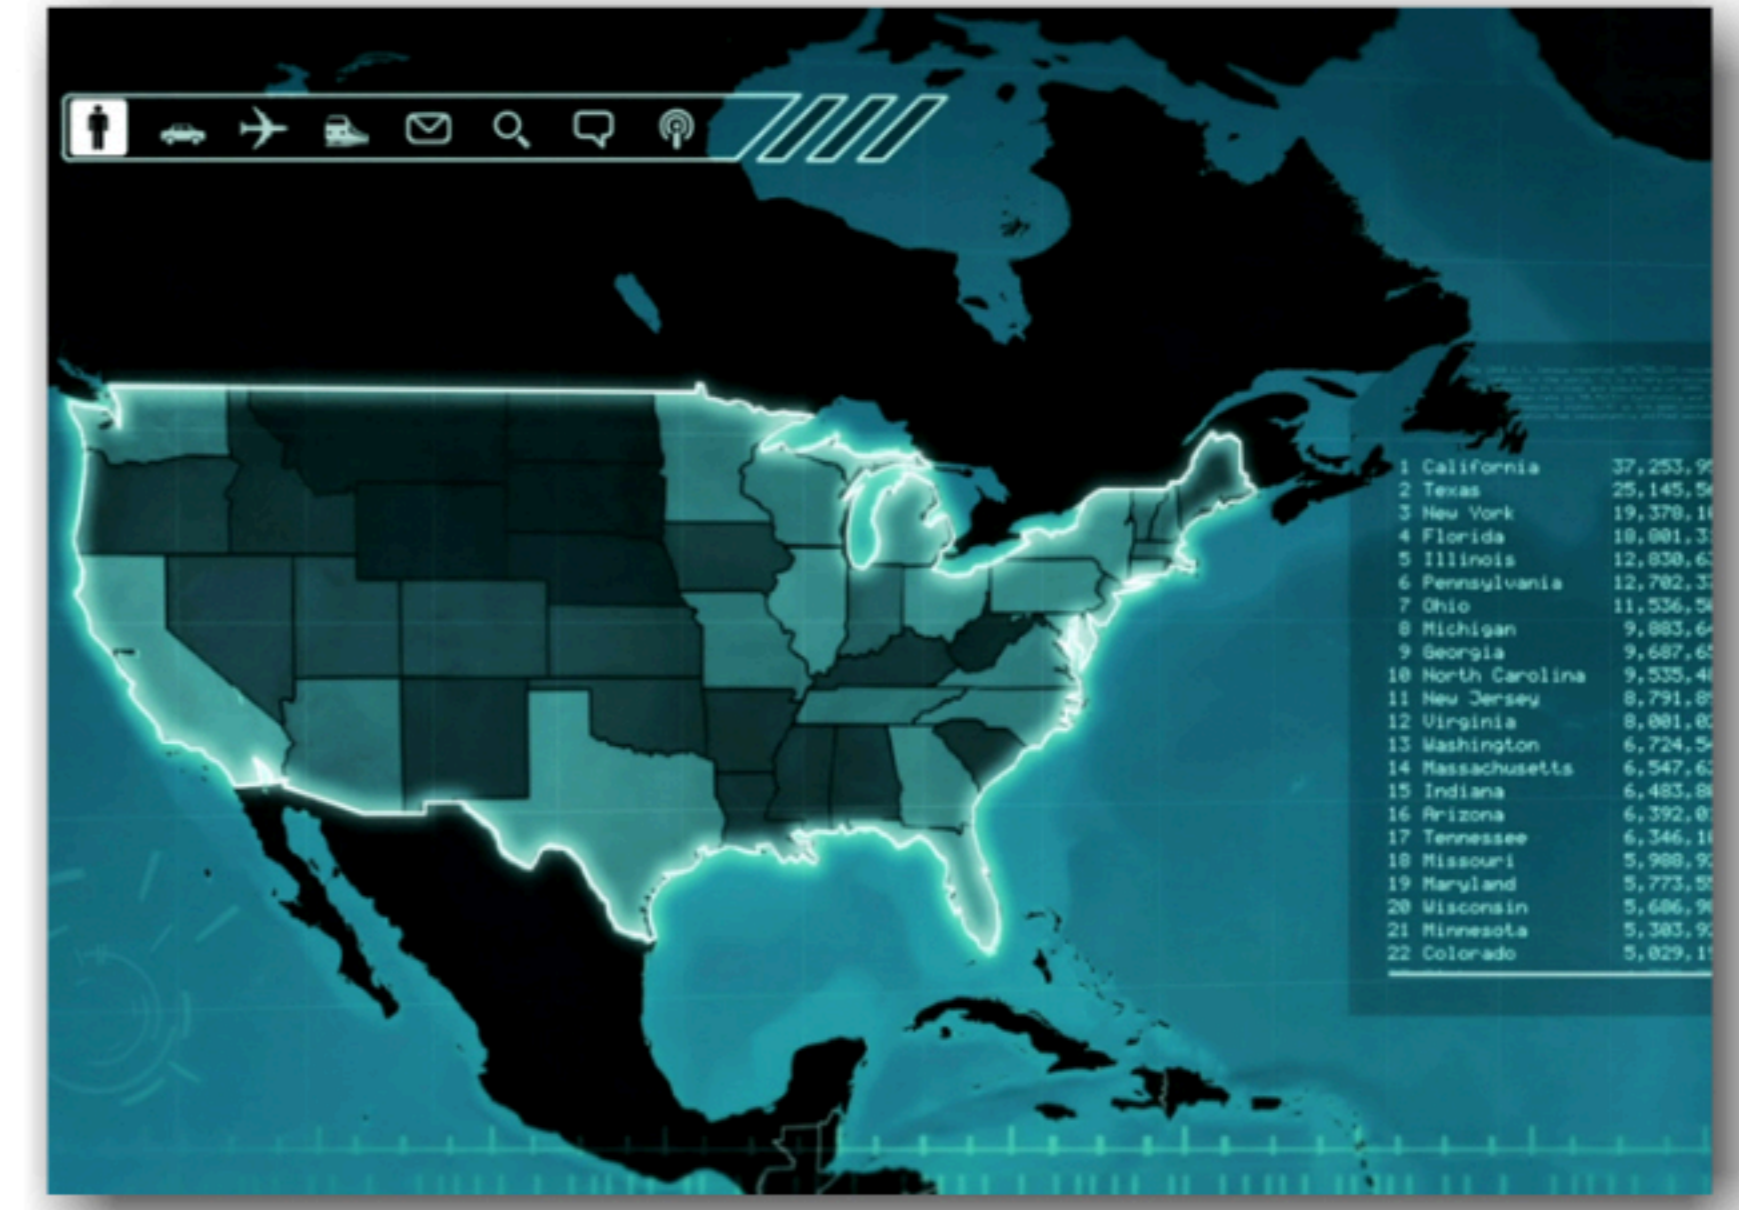

The quantity of something in a given space or area.

i)

The concentration of people in a given area.

Geographers use population maps to study population geography. **Population geography** is a study that is focused on human distribution and density. To study these factors, population geographers examine changes in population and peoples' movements over time. Population geography is closely related to **demography** (the study of population statistics and trends). Population density is also related to population geography. **Population density** is the study of the concentration of people in an area by dividing the number of people present by area.
