

ES

**Explore Online:**

Open Google Earth™ and search for "World Population Animation" in the Earth Gallery. Explore world population distribution and see how locations have changed over time. To do this, move the slider in the Historical Imagery tool.

**Explore Offline:**

Choose a continent to enlarge it. Study the map of population distribution throughout the continent. Touch a date on the slider to switch to an earlier time in history. What do you notice about the distribution of population in the continent?

\*\* Antarctica does not have a permanent human population.
