

ES

 **Explore Online:**

Use the zoom feature of Google Earth™ to look at North America or your continent, then your country and finally your state/province. What details can you see when you look at your state/province that you could not see when you looked at the whole of North America or your continent?

 **Explore Offline:**

Choose your continent below. Touch your region within your continent. Trace your country, then touch the “CAPTURE” button . Label your country with any information you know about it.

PACIFIC ISLANDS

AUSTRALASIA
