small villages ary, cold mistral winds 🔰 ancient Roman ruins 2. Put a check mark (x) next to the answer that is most correct. a) Why are some homes in the Pelopornese empty? A they are old and off them behind and moved away to the cities  $\bigcirc$  B younger people ha O C people prefer r O prices are high b) Which human activities and features are studied when geographers look at a region? A the language(s) spoken O B where people live O **C** why people live where they do O **D** all of the above

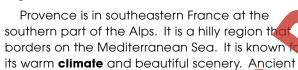

🔰 Reading Passage

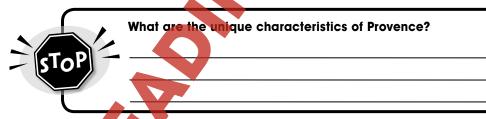

NAME: \_

## **Europe - Regions**

eographers use the word region to describe an area of land. A region can be either small or large, and can be studied over time to see how it changes. A region is described by the features that make it unique. Geographers look at a region's physical characteristics, such as mountain ranges or vegetation, to see how it is different from others. Another way to describe a region is by language, or by looking at where, how, and why people live in a certain area. Europe has a wide variety of regions.

Roman ruins can be found in Provence The original in the town of Avignon are famous in song. Artists have painted its fields of **layender** and sunflowers, and stories have been written about the small villages found throughout the hills. However, when the dry and cold **mistral** winds blow, people find shelter and enjoy the food and drink for which the region is famous.

The Peloponnese is a region found in southern Greece. It is a **peninsula** separated from the rest of Greece by a deep canal at Corinth. The region is hilly, with twisty mountain roads. Small villages dot the landscape, with many older homes left vacant as young people moved to the cities. Winter days are mild, with cold nights, but summer days are very hot. Driving through the Peloponnese, you might see sheep, apple orchards, and people making cheese. One specialty of the region is green Kalamata olives, famous for their taste.

## Europe - Regions

Answer each question with a complete sentence.
Which features are used to describe a region?
What features make the Peloponnese unique?

#### Research and Extensions

© CLASSROOM COMPLETE PRESS

**5.** Compare **two** different regions in Europe using the Venn diagram on the next page. You will need to conduct some simple research to find facts to include in your Venn diagram.

#### When collecting information, try to find answers to these questions:

- What are the physical characteristics that make each region unique?
- What kinds of human activities take place there? Where do people live in these regions?
- What language or languages are spoken there?
- What vegetation grows in these areas?

Find answers to these questions for **two** of the following regions:

Provence the Peloponnese the Black Forest the Russian steppes

The Scottish highlands the Pyrenees mountains the Loire River region
