4. Why are democracies always working toward electoral reform? Your

10

World Electoral Processes CCP5762-7

answer should be one to two complete sentences.

© CLASSROOM COMPLETE PRESS

Electoral Systems and Reform

lectoral systems are always changing because the needs and wants of citizens are always changing. As time goes by, countries may find that some of their electoral practices are out of date and need reform. Other countries may decide to become democracies.

A free and fair election is a major component of all democrace If people do not have the opportunity to elect their leaders, their country is not a democracy. Whenever a country changes from a dictatorship to a democracy, there are safety concerns for the citizens.

Many times, the people who worked for the former dictator try to prevent people from voting. There are several organizations, such as the United Nations Fair Elections Commission, that can help ensure that the people can vote safely.

What does the United Nations Fair Elections Commission

Technology can also lead to electoral reform. Old voting systems may not be as accurate as new voting systems. In many countries, paper ballots that the voters punch out are becoming obsolete because they can be difficult to read. Many voting districts in the United States are changing from voting booths to computerized voting because the results are faster.

Voter fraud is a common concern for voters. There have been many elections around the world that have been affected by fraud. Voter intimidation is one way fraud can affect an election. People have even threatened violence and made bomb threats in order to disrupt elections.
