

CONTENTS

Title	Curricular Tie-In	
1. True 'Nuff	Social Studies: Critical Thinking Language Arts: Aphorisms, Proverbs	21
2. Horse Trading	Mathematics: Story Problem (Arithmetic) Social Studies: Predicting Behavior	26
3. Utah or Maine?	Social Studies: U.S. Geography Language Arts: Connotations of Words (Semantics)	28
4. Eighteen is the Answer	Mathematics: Equations Language Arts: Descriptive Writing	31
5. Figure It Out	Mathematics: Geometric Shapes Social Studies: Presumptions about Behavior	33
6. Which Would You Take?	Science: Ecology Art: Sketching	36
7. Find the Stray Animals	Science: Biology (Taxonomy) Art: Drawing, Modeling Language Arts: Songs, Poems, Stories	40
8. Seven Plus Four Equal Nine	Mathematics: Story Problem for Measurement of Time Art: Diagramming	43
9. Longitudes and Latitudes	Social Studies: Geography (Map Reading) Mathematics: Percentages	45
10. The Mixing Problem	Mathematics: Liquid Measurement	48
11. A Likable Community	Social Studies: The Community Language Arts: Similes	51
12. The Professor	Language Arts: Spoonerisms	54
13. Time	Language Arts: Cinquains	56
14. Working Initially	Social Studies: Occupations, History (Surnames)	60
15. Doubles	Language Arts: Synonyms, Couplets	63
16. Surviving	Social Studies: Customs, Fashions, Institutions	67
17. Parkside	Language Arts: The Mystery Story	70
18. Hear Here!	Language Arts: Homonyms, The Advertisement Art: Drawing	73
19. Percentage Baseball	Mathematics: Algebra	77
20. What's Your Impression?	Language Arts: Adjectives, Haiku	79
21. Hope Springs Eternal	Language Arts: Personification, Aphorisms, Poetry	82
22. The Riddle as Paradox	Language Arts: Riddles, Paradoxes Science: Paradoxes in Nature	86
23. Pictures for Words	Language Arts: Vernacular Art: Drawing (Cartoon)	89
24. Do You See the Connection?	Language Arts: The Short Story, Analogies	92
25. Misguided Words	Language Arts: Vocabulary Study, Malaprops	97
26. Find the Missing Number	Mathematics: Arithmetic Progressions	100
27. Demons	Language Arts: Spelling	103
28. Music for Life	Science: Biology (Taxonomy) Music: Musical Styles	106
29. The Weather Report	Science: Weather	109
30. Biological Puns	Science: Biology (Taxonomy)	111

This book covers the content areas and basic skills listed below. Numbers in parentheses refer to units.

Language Arts

adjectives (3, 11, 20)
the advertisement (18)
analogies (24)
aphorisms (1, 21)
cinquains (13)
couplets (15)
description (4)
exposition (4)
haiku (20)
homonyms (18)
interviewing (5)
malapropisms (25)
the mystery story (17)
paradoxes (22)
paragraphing (11)
personification (21)
poems (7, 20, 21)
proofreading (29)
proverbs (1)
the riddle (22)
semantics (3)
the short story (7)
similes (11)
spelling (27)
spoonerisms (12)
synonyms (15)
vernacular (23)
vocabulary (25)

Mathematics

addition (2)
algebra (19)
arithmetic progressions (26)
division (9)
equations (7)
geometric shapes (5)
liquid measurement (10)
percentages (9, 19)
subtraction (2)
time measurement (8)

Social Studies

behavior (2, 5)
the community (11)
critical thinking (1)
customs (16)
fashions (16)
geography (3, 9)
history (14)
institutions (11)
occupations (14)

Science

biology (7, 28, 30)
ecology (6)
taxonomy (7, 28, 30)
weather (29)

Unit 1

True 'Nuff

The wisdom of a people is found in the sayings they pass down through the ages. One kind of saying is the proverb. A *proverb* says something, but it is not always an exact guide for your behavior. Sometimes you can turn it around and get some good advice, too.

"There is no money in poetry, but then there is no poetry in money," according to British poet and critic Robert Graves. How true. The old song that starts "Tea for two and two for tea" does this same kind of reversal with its lyrics. With a little reflection, you can find countless other sayings that can be reversed. For example, an old saying tells us, "He who hesitates is lost." The wisdom of the saying is apparent to someone who has an opportunity to help, explain, refuse, or accept, but then hesitates to do so; that moment to act has been lost forever. On the other hand, the saying can be reversed: "He who's lost, hesitates." If you have ever been lost and confused about where you are when you are trying to find your way in a strange place, you can appreciate the truth of that statement also.

Here are some other reversed sayings:

"Look before you leap" reverses to "Leap before you look." When would the last statement be good advice?

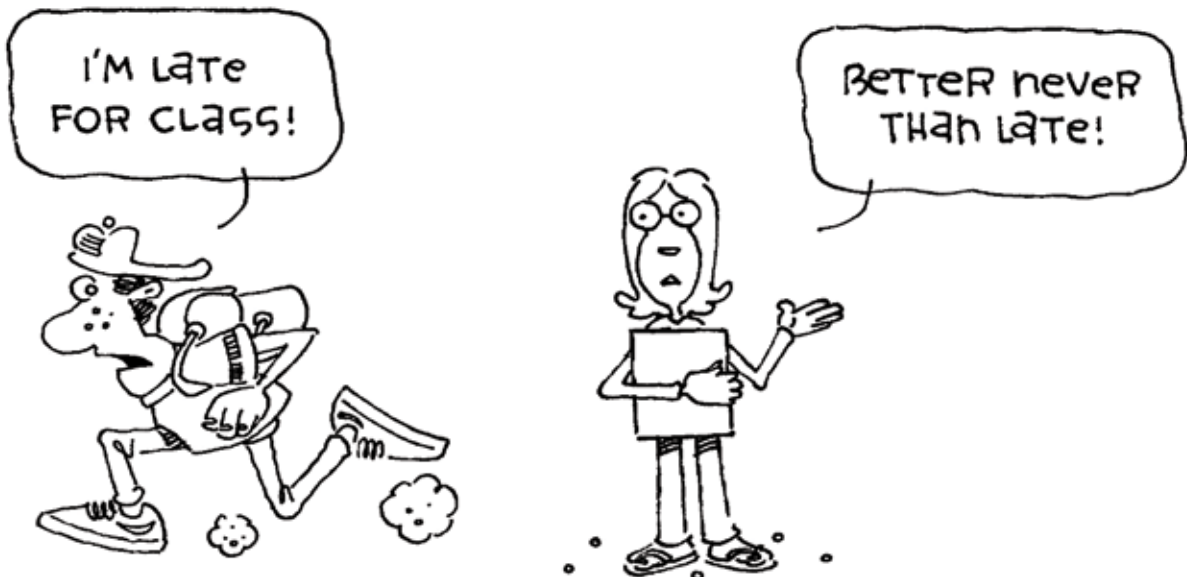

Does the reversal of "Clothes make the man" make sense? Why or why not?

Could the reverse of "Don't make a mountain out of a molehill" be true? How?

When reversed, "All that glitters isn't gold," is "All that's gold doesn't glitter." Do you agree? Why or why not?

Reverse "Better late than never." _____
For whom would that be a reasonable statement? _____
Explain why. _____

When you reverse "Heroes are born, not made," it becomes "Heroes are made, not born." Does it make sense either way? Explain.

When you reverse "The key to maintaining the water supply is controlling the population growth" (as in the arid Southwest), you get "The key to maintaining population growth is controlling the water supply." Does the second statement make sense? Explain.

"Life is just a bowl of cherries" can be reversed, in a spooneristic way, to "Life is just a chair of bowlies." What would a chair of bowlies look like? Draw one.
