

MULTIPLICATION

GRADES 3 & 4

This workbook provides a variety of activities designed to enrich and reinforce multiplication skills typically taught at the third and fourth grade levels.

The material correlates with the curriculum in most basic mathematics texts. The pages are presented in a suggested order, but may be used in any order which best meets a child's needs.

Parents who wish their children to have practice in mathematics skills will find the book as helpful as classroom teachers will find it. The exercises are presented so that a child can work with a minimum of supervision. Additional features of this book are included on the next page.

Answers are included in a four-page leaflet at the end of the book. This leaflet can be easily removed.
