

Colour her dress red.  
Colour her shoes black.  
Colour her hair yellow  
Colour the spoon brown.  
Colour the bowl green.  
Draw a spider on the dragline.

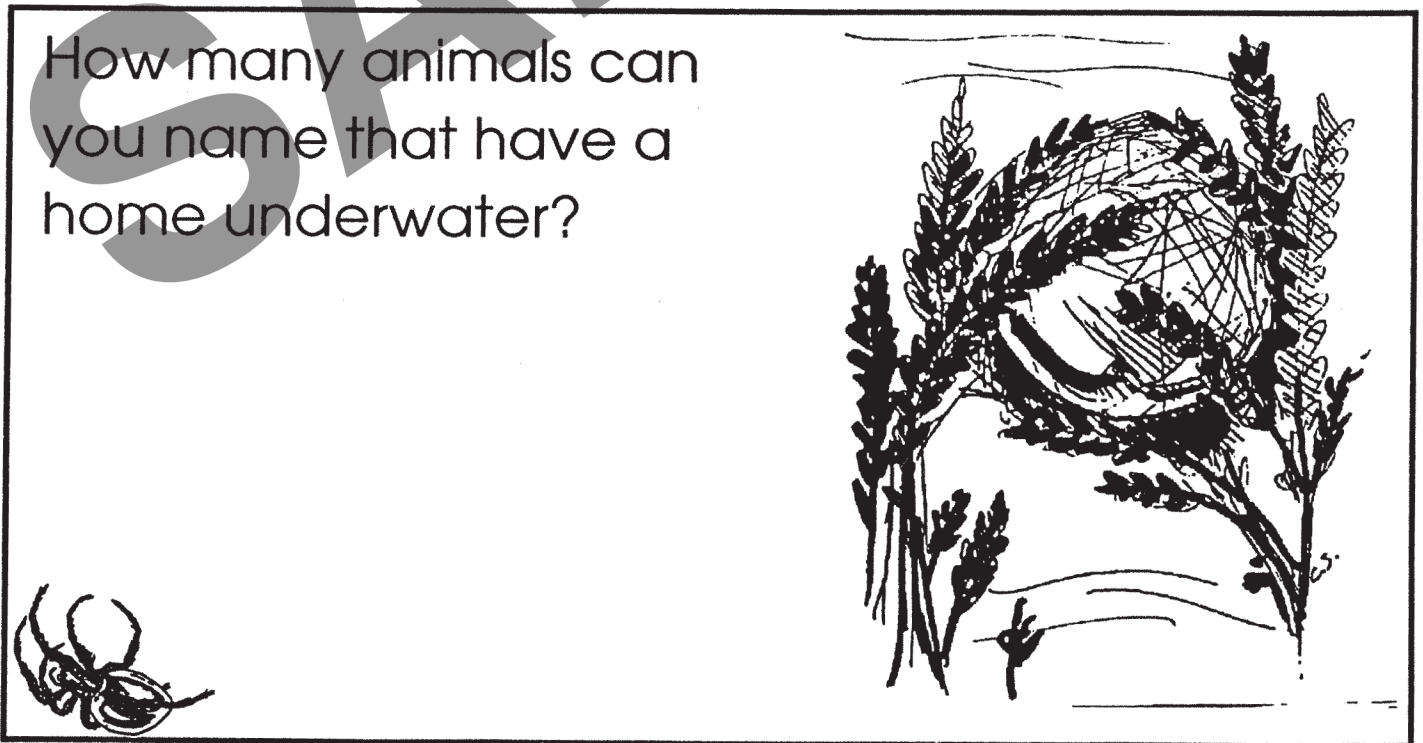

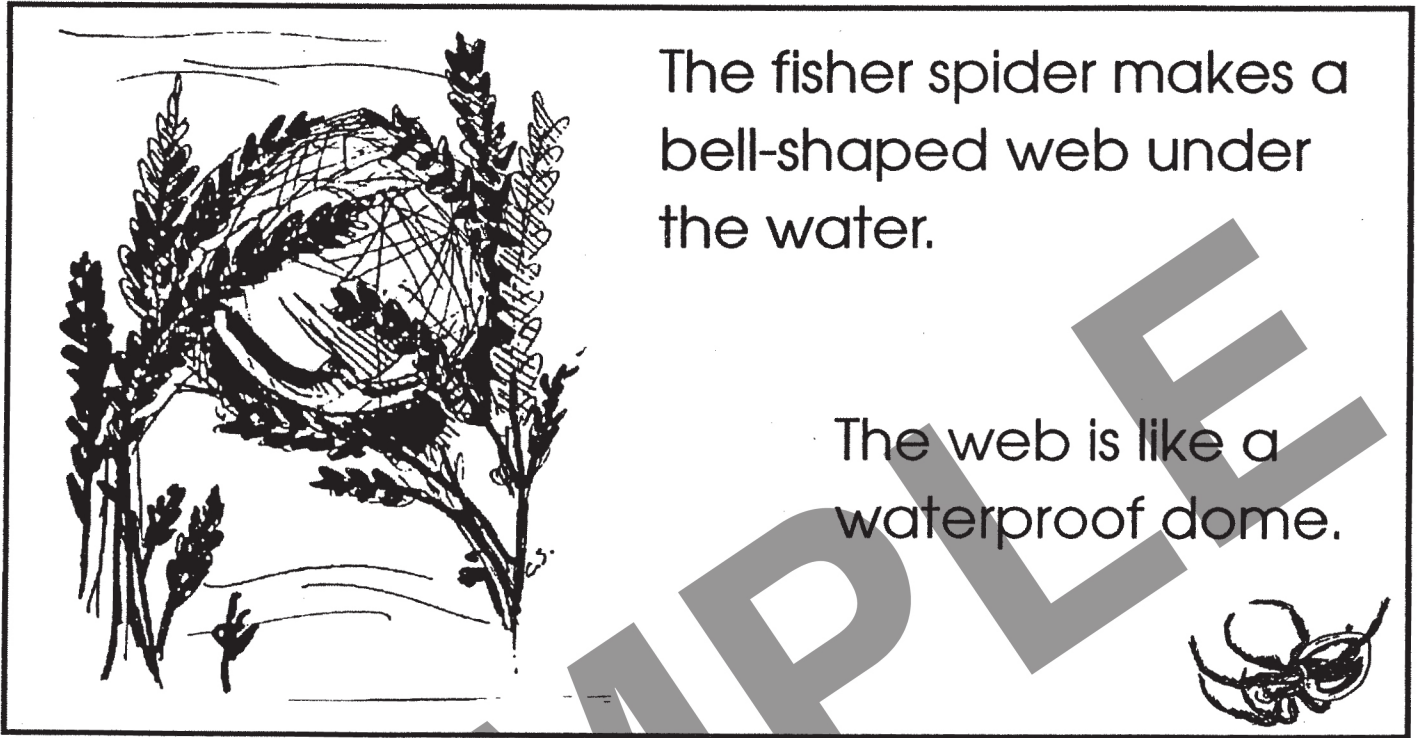

## The Fisher Spider

The fisher spider lives underwater.

It needs its own air supply.

The spider traps tiny air bubbles in the hairs of its legs and takes the bubbles down to fill the web.

The fisher spider eats fish and insects underwater.  
What other animals can catch fish?
