

Animal Alphabet Cards

The cards have been left blank so that the individual teacher can print or write the letters to suit the style of handwriting taught at your grade level.

1. Make a set of cards to keep on file.
2. Write/Print the letters on each card.
3. Colour, mount and laminate your class set.
4. Display.

The set of cards can be used in the following ways:

1. Classification/Identification of animals.
2. Students can research an animal and prepare a report.
3. Students can design similar cards and develop individual alphabet cards/booklets.
4. Students can colour the cards. They must research the animals to make sure the colours are accurate.
