CANADA EH

UNIT OVERVIEW

This unit is divided into three parts.

PART I - CANADA (General Information)

The main objectives of the first segment are knowledge-based with students being expected to know the names and locations of the provinces, territories and capital cities. Overhead notes and a map activity are central to this section. Activities are:

- 1) Map of Canada Students complete a map of Canada labelling provinces, capital cities and oceans.
- 2) Letter Writing To Provinces
- 3) Wordsearch
- 4) Canada's Coat of Arms
- 5) Map Review and Test

PART II - LANDFORM REGIONS OF CANADA

Part II studies the main landform regions of Canada emphasizing industries important to each area. Student notes follow closely with short assignments related to the regions.

- 1) Landform Regions Map
- 2) Maritime Region (Map Skills)
- 3) St. Lawrence Lowlands/Great Lakes Region (Graph Skills)
- 4) Prairie Region (Map Skills)
- 5) Western Mountain Region (Concept Map or Web)
- 6) Canadian Shield (Mapping Skills)
- 7) Tundra Region (Discussion)
- 8) Canada In Jeopardy (Game)

PART III - PROVINCES AND TERRITORIES (Travel Agent - Group Project)

In this flexible, student-driven section, students become travel agents trying to attract tourists to their province or territory. Students choose from a wide range of activities which include:

STUDENT NOTES

Student notes, suitable for overhead transparencies accompany the unit. They follow with the material covered in the assignments and give the unit some structure as well as giving the students something to study from. Often, giving notes for the first portion of a class is a good way to settle students down after a break but when and what notes should be given is left at the discretion of the teacher. As well, some teachers may wish to write the notes on the board, dictate the notes or hand out photocopies instead of using the overhead projector.

A.I.F.S.

The reminder (A.I.F.S.) will appear after questions requiring a complete sentence for an answer. Answer In a Full Sentence

LESSON #1 - MAP OF CANADA

Student Objectives and Activities

Students use atlases or a large wall map to complete a political map of Canada showing the territories, provinces, capital cities and oceans.

Suggested Teaching Strategies

- As a fun way to kick off the unit, challenge students to draw a freehand map of Canada on a piece of scrap paper in only five minutes. The difficult activity is a bit frantic and although some students are totally helpless, it works as a great motivator. (Try it yourself)
- Before beginning the map activity, hand out a copy of the "Map Rules" page to each student. Students cut out the rules and glue them to the inside of the cover of their social studies notebook for future reference.
- Explain the rules and the reasons for them. (If you already have a format for maps, disregard these rules)
 - Name in top righthand corner.
 - 2) All labels must be printed in pen.
 - All labels must be horizontal. (except for rivers) Use a ruler!

 Do not colour entire ocean blue. A thin blue border is all that is needed. 4)
 - Colouring is to be done in pencil crayon using light shading. (No markers please)
- Give each student a blank photocopy of the map of Canada and write the names of the places students will be expected to know on the board. Students copy this list onto the back of their map before starting the map. (Previously, I used to leave the place names on the board overnight for students who did not have time to finish with a P.L.O. (Please Leave On) sign boldly showing. Apparently however, the caretaker confused this sign with a group of people trying to liberate Palestine and invariably the list was erased the next day)
- Students then begin labelling the map by first drawing light horizontal lines in pencil where a label must go. ("Horizontal lines go the same direction as the horizon" is a way to help students remember. The teacher should demonstrate how lining a ruler up with the edges of the page is used to make a horizontal line.
- After labels are printed on (in pen) the lines can be erased. (Some students like to first print the labels in pencil, check with the teacher and then overwrite them in pen later)
- Students colour the map, using light pencil crayon. Dark pencil crayon and marker should ed since labels will be impossible to read.
- tlases can be used for this activity but a large, modern wall map is best.

*** Note For Teachers in Rural Schools ***

It is possible to determine how "modern" your school's supply of maps is by checking to see whether Newfoundland is a part of Canada yet.

2000	29,000,000	
2014	35,163,430	
•		

CANADA'S POPULATION

LESSON#2 - LETTER TO THE PROVINCES

Student Objectives and Activities

Students write letters to provincial tourism offices to obtain free information that will help them in part III of the unit.

Suggested Teaching Strategies

- Begin by dividing students into groups and having each group choose territory to write to.
- To insure that each student receives something in the mail, it is best if each student writes and sends a separate letter. (This will reduce feuding over who gets to keep this extremely valuable information if students send letters as groups.)
- Before students write the letters, discuss what should be in the letters and go though to old "first impressions" routine stressing why a letter should be perfect.

PART III - PROVINCES AND TERRITORIES (Group Project)

In this section, students become travel agents trying to attract tourists to their province or territory. (Students should have already selected their province or territory in Part I and hopefully will have received information back from the various tourism boards) A contract format is used with students selecting from a variety of assignments. Note that the first three assignments Provincial Coat of Arms, Information Factsheet, and Freehand Map, are to be done by all groups. (This information can be found easily in Worldbook Encyclopedia) The remainder of the assignments are much more flexible and creativity should be encouraged.

Each group must select assignments from the outline that and up to locality to perform these assignments. The groups of 2 or 3 students, must then consult with the teacher beginning the assignments to outline their ideas and designs. Students can be encouraged to the encouraged to assignments they might choose to do instead of assignments outlined in the Each group must select assignments from the outline that add up to 100 marks and fill out a contract handout.

Evaluation: Product/Presentation

More challenging assignments receive higher marks than

The teacher could be responsible for marking product (any reports, written work, drawings, or other "concrete" material) while students could be it volved in evaluation of any presentations that are

Group Project Alternatives

Instead of using the contract format which allows students to choose their own assignments, the teacher may pick two or three of the assignments and have all students do the same activities. Assignments that would be most suitable would be:

- ravel Brochure
- ladio 🧲 ommercial
- Provincial Flower

ite a report on one of the provinces or territories. Students could also

CANADA

Canada is the second largest country in the world. However, even though it is large in size, Canada does not have a very big population (35,163,430 in 2014). The capital city of Canada is Ottawa. One reason that Ottawa was chosen to be the capital was that it is located on the Ottawa River which divides the provinces of Quebec and Ontario.

FACT FILE - The name Canada comes from the Iroquois Indian word "kanata" which means the village of the small houses

Canada is bordered on three sides by water as well as the United States to the south.

East - Atlantic Ocean West - Pacific Ocean North - Arctic Ocean South - United State

CANADA PoP: 35,163,430

FACT FILE - The Greater Tokyo Area (consisting of the city of Tokyo and surrounding area) in Japan has about the same number of people living in it as in all of Canada (in 2014)!

#3 - WORDSEARCH

bjectives and Activities

e objective of this assignment is to increase familiarity with the place names covered in this tion.

Teaching Strategies

gin the overhead notes on Canada.

ter completing the notes, students do the wordsearch first individually, then in pairs.

or's Note ***

thaps one of my happiest days as a teacher was the time I made 23 different wordsearches ng the same word list. I gave different wordsearches to unsuspecting members of a grade six ss notorious for copying answers. When they tried to steal each others answers the looks to rold were priceless!
