

# How to be Safe in the Real World

## At Home

- in an emergency, call 911
- check fire alarms and carbon monoxide detectors often
- don't open the door to strangers
- lock your doors when you're home alone
- always close your curtains when dressing
- leave outside lights on after dark

## Personal

- know what you're comfortable with
- don't be afraid to say no
- keep your space 1.5-4 feet apart

## Online

- don't give anyone your personal information
- don't meet someone in person that you've met online
- be careful about what pictures you share
- use the privacy settings of social media sites

## Social

- it's okay to say no when someone makes you uncomfortable
- keep your space 4-12 feet apart

## Traveling

- know your route
- look at a map when lost
- ask a business or police officer for help
- look before crossing the roads
- don't pick up hitchhikers
- be aware at all times, especially if wearing headphones or texting while walking

## In the Community

- it's okay to say no when someone makes you uncomfortable
- keep your space 4-12 feet apart

## At School

- if you stay late, have someone you know walk you to your car
- don't stay late by yourself
- know the fire route

## Name other ways you feel safe.
