Activity One

Venn Diagram

Below is a picture of a world map and a picture of a globe. In the venn diagram, list the differences and similarities between these two formats.

NAME: _____

Activity Two

Longitude/Latitude Bingo

Photocopy the blank variation of the Bingo card that is provided. Cut out the island graphics and place them on your Bingo card. When a longitude and latitude coordinate is called out, cross it off your Bingo card. The first person to have all their islands crossed off wins.

Activity Three

Scavenger Hunt

Get into groups of 4-5 and plan a scavenger hunt for the rest of your classmates. Hide 5 different items in your classroom or school. Draw a map of your classroom or school, including several landmarks. Include the 5 items and their hiding places on your map. Give the map to your classmates and have them search for your hidden items. The map should be clearly labeled, allowing your classmates to have no trouble finding your hidden items.

Activity Four

Amenities

Below is a list of amenities that can be found in any urban community. Using Google Earth™ or a local map, find each amenity in your community. As an added activity, record the coordinates for each amenity.

Amenity	Coordinates
Your Home	
Your Friend's Home	
Your School	
Park	
Library	
Hospital	
Mall/Shopping Center	
Police Station	
Grocery Store	
Post Office	
Gas Station	
Fire Station

Activity Five

Country Brochure

Research your own country and make a brochure encouraging people to visit. Include the following in your brochure:

- A brief history of your country
- Its physical attractions and wildlife
- Climate
- Geographical features
- Cultural features
- Tourist attractions

A brochure is designed to sell the idea of visiting your country on vacation to your audience. Make sure to include images and reasons why people should visit your country.

Below are some images of examples of brochures.

As an added activity, choose a country not your own that you would like to visit and do some research on it. Create a brochure for that country by following the criteria listed above.

Activity Six

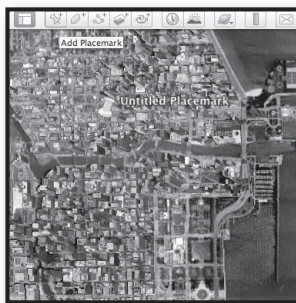

World Tour

Create a world tour using Google Earth™. Start with a starting point for your trip, for example your hometown. Click “Add” and “Placemark” from the top navigation bar, or click the “add placemark” icon in the toolbar at the top of your screen. You may move your placemark to a specific spot or keep it in a general area. You can also change the icon by clicking the image button to the right of the new window that has opened. Give your placemark a name and short description. Press OK to save your placemark in the “My Places” tab.

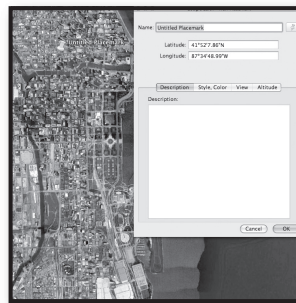

When you have chosen all your destinations for your tour, right click the “My Places” tab and click new folder. Name your folder “My Tour” and drag your placemarks into the folder. To view your virtual tour, click on your tour folder and select “Play Tour” by clicking the folder icon at the bottom of the “Places” tab.

To see some examples of already created tours, click the “Earth Gallery” icon in the “Layers” tab. Below are some screenshots to help you out.
