BLOOM'S TAXONOMY

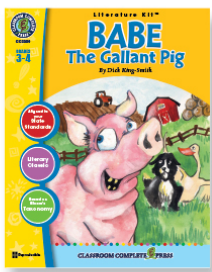

We utilize **Bloom's Taxonomy** for Reading Comprehension as a widely used tool for classifying learning objectives. Based on the **Six Levels of Thinking**, questions are given that challenge students to not only recall what they have read, but to move beyond this to understand the text through higher-order thinking. Along with an assessment rubric, we include a **Critical Thinking Skills Rubric** for teachers to see how each chapter section meets the requirements laid out in the Six Levels of Thinking.

"Has everything you need in one packet."
